A MESSAGE FROM

Chairman and Managing Director

Commenting on the performance for Q1FY26, MR. VIVEK SARAOGI, Chairman and Managing Director of Balrampur Chini Mills Limited, said:

"The Company has commenced the fiscal on a steady note. Revenues were up in both sugar and distillery segment owing to higher volumes and increased realizations.

During the quarter ended June 2025, sugarcane crushing was lower by $\sim 66\%$ and sugar production declined by $\sim 65\%$. This decrease is owing to lower sugarcane availability during the season. Further the fixed overheads could not be absorbed fully in this quarter owing to curtailed crushing/season days.

We are working on cane development activities and varietal rebalancing.

For the ensuing season, IMD is forecasting above-normal monsoon which may aid to better yields subject to conducive weather conditions before commencement of season. Lower diversion of cane towards Gur-Khandsari and improved yields are expected to help offset the lower cane availability caused by reduced acreage in Uttar Pradesh. In Maharashtra and Karnataka there is expectation of higher cane thereby higher sugar production.

Expected sugar inventory at \sim 5.30 MMT as on 30th September 2025 in the country alongwith expected production of 34.90 MMT (prediversion) for the SS 25-26 and domestic consumption of around 28.50 MT necessitates diversion of sugar \sim 4.5 MMT minimum and potentially even permit exports. Historically, a closing stock of 5.20–5.50 MMT has been considered adequate.

We remain optimistic about the long-awaited revision in ethanol prices under the Juice and B-heavy routes, along with an upward revision in the Minimum Sale Price (MSP) of sugar. These announcements when approved should boost the prospects of the sugar industry.

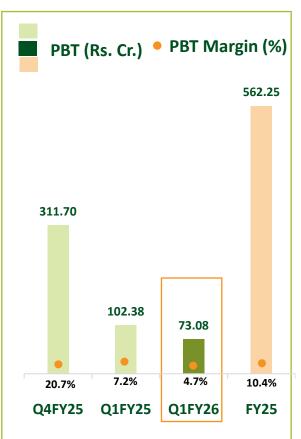

We continue to make healthy progress on Polylactic Acid (PLA) project. Construction activities have started and we have also started developing the market by way of trading of imported PLA. Till 31st July 2025 ~Rs. 927 crores has been spent (Rs. 460 crores via Debt and balance from internal accruals).

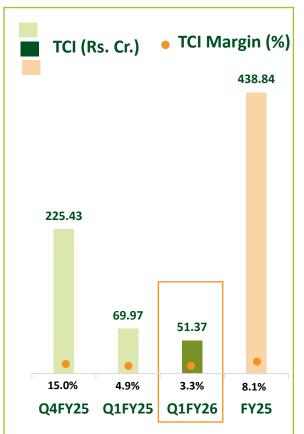

At BCML, our commitment to sustainable value creation extends to optimizing every aspect of our operations, ensuring maximum value extraction from each stick of cane. The introduction of the PLA project diversifies our product range and aligns with global environmental goals by offering an environment friendly alternative to traditional plastics. Leveraging our integrated operations and strong financial health, we remain dedicated to deepening our relationships with Environment and enhancing operational efficiencies. We will continue to invest judiciously and create value for our shareholders."
