‘Bioyug on Wheels’ rolls into Kochi to spotlight PLA Innovation at KPLEX Expo 2025

(BCML’s nationwide mobile campaign arrives in Kerala to showcase PLA bioplastics and drive awareness on circular economy solutions at KPLEX Expo 2025)

Kochi, September 14, 2025 – Balrampur Chini Mills Ltd (BCML) continues to drive its impactful nationwide outreach initiative, ‘Bioyug on Wheels’, with its latest stop in **Kochi, Kerala**, during the prestigious **KPLEX Expo 2025 – International Plastics Exhibition & Conference**, held from **September 11th to 14th**. This mobile awareness campaign is a cornerstone of BCML’s broader mission to promote circular economy principles and mainstream the adoption of bio-based innovations such as PLA (polylactic acid) bioplastics across India.

Since its successful launch in Mumbai in May 2025, Bioyug on Wheels has travelled across key regions—including cities in Jharkhand, Madhya Pradesh, and Gujarat—engaging thousands of stakeholders through a series of immersive, knowledge-driven rich experiences. These include live demonstrations, interactive exhibits, expert dialogues, and collaborative sessions with academia, industry, and policy influencers.

The Kochi edition marks a key moment in the journey of Bioyug on Wheels, bringing the mobile exhibition into the heart of Kerala’s innovative landscape. At KPLEX, a major platform for materials and technology, Bioyug is sharing new possibilities in climate-friendly materials like PLA bioplastics—highlighting their role in shaping a more sustainable future across sectors like packaging, textiles, and agriculture.

Key Highlights of Bioyug on Wheels’ Kochi Edition at KPLEX Expo:

- **Institutional Engagement:** Representatives from the Central Pollution Control Board (CPCB), as well as the Presidents of the Telangana, Karnataka, and Andhra Pradesh Plastic Associations respectively visited the Bioyug on Wheels pavilion, showing strong institutional interest in sustainable material alternatives.
- **Industry Participation:** More than 250 industry professionals visited the mobile unit on the second day alone, underscoring growing momentum for bio-based solutions in the South Indian plastics and manufacturing ecosystem.
- **Interactive Format:** The mobile unit’s engaging format—featuring PLA samples and technical showcases attracted manufacturers, entrepreneurs, policy advocates, and academia alike.

Speaking about the Kochi edition, **Ms. Shweta Suryawanshi, Business Development Head, BCML PLA Division**, said: *“Kerala is home to a fast-evolving ecosystem of eco-conscious consumers and forward-looking enterprises. The KPLEX Expo serves as a strategic platform to engage with key industry stakeholders, explore the transformative potential of PLA bioplastics, and spotlight practical, scalable solutions for a more sustainable future. This momentum is further reinforced by Kerala High Court’s mandated ban on select single-use plastic (SUP) items, set to take effect on October 2, 2025. The ban includes items like plastic water bottles, soft drink bottles, plates, cups, straws, and bakery boxes—particularly in hilly tourist destinations, official functions, and eateries across the state. As regulatory landscapes evolve and market demand for eco-friendly alternatives intensifies, Bioyug on Wheels serves as a vital interface between innovation and implementation. Our goal is to foster industry-wide collaboration, accelerate adoption of compostable materials, and support the larger shift toward a circular bioeconomy.”*

Following its successful showcase in Kochi, *Bioyug on Wheels* will continue its journey across Southern India, engaging a wider spectrum of communities, institutions, and enterprises committed to building a greener, more sustainable future.

About Balrampur Chini Mills Limited (CIN: L15421WB1975PLC030118):

Balrampur Chini Mills Limited (BCML) is among India's largest integrated sugar companies, excelling in distillery operations and power cogeneration. With ten sugar factories across Uttar Pradesh, BCML boasts an aggregate crushing capacity of 80,000 TCD, distillery operations of 1050 KLPD, and power cogeneration capacity of 175.7 MW (saleable). BCML continues to lead the sector with innovative, eco-friendly solutions.
